

Our experts work with clients and their lawyers to take the stress out of a difficult process.

Who?

US taxpayers based in the UK going through a divorce.

What?

UK-based Americans and their lawyers can rely on us to help them understand the US and UK tax implications on a divorce, so that it can be factored into settlement agreements.

Buzzacott were absolutely masterful in helping us work through the complexities of two sets of tax laws.

How we help

- Review of the draft Order of the Court
- Current and future UK and US Capital Gains Tax (CGT) exposure
- Sale of the matrimonial home and other assets
- US tax implications on transferring a UK pension
- Payment of maintenance / alimony
- Complications when remitting offshore funds for resident non-domiciled individuals in the UK
- UK tax returns
- US Federal and State income tax returns

We agreed Buzzacott could be a resource, but not an arbiter. This made it very possible for Buzzacott to offer excellent advice, that was viewed as impartial by all parties.

Why?

We know that navigating an unfamiliar tax environment can be confusing, and we're here to simplify it.

How?

We like to get to know our clients well, and we're passionate about looking after them. Our team of dual-qualified US and UK tax advisors help simplify today's complexities, address tomorrow's challenges, and take fear out of the equation. We anticipate problems before they happen, and offer tailor-made solutions.

There was obviously a lot of hurt between the two of us but we were completely aligned with working with Buzzacott to say, how can we legally and ethically minimise the tax consequences of this divorce.
