### Introduction

This statement has been prepared in accordance with the requirement for all firms accredited for probate services to collect, report and publish diversity data about their employees. While this is a regulatory requirement, we fully support and agree with the ICAEW's view on the benefits of focusing on diversity and inclusion. We are excited to share the results of our recent ICAEW 2025 Probate Diversity Survey.

Between 25 March 2025 and 2 April 2025, all team members, including Partners, were invited to participate in this anonymous survey. Although participation was not mandatory, it was highly encouraged.

We are pleased to report a response rate of 71%. This high level of engagement reflects the firm's collective commitment to fostering a diverse and inclusive workplace. It is important to note that, as not everyone participated, the figures shown below do not fully represent the firm's diversity makeup. Despite this, the proportion of grades who responded remains largely similar to the 2023 data, meaning that it is still possible to draw comparisons between the two data sets.

Since our last ICAEW Probate Diversity Survey in 2023, the firm has made significant progress in embedding Equality, Diversity & Inclusion (E,D&I) into our culture.

In 2024, we launched 11 Staff Networks, with over 175 team members joining

at least one network, and 76 team members participating in multiple networks. These networks provide a supportive and safe space for open communication. Alongside these networks, we established an E.D&I Committee, including our Managing Partner, firm Chair, Growth Partner, HR Partner, and the Network Chairs and Sponsors. The committee meets once per quarter, to discuss future plans and reflect on past events. We encourage our Partners and Directors to take ownership of E,D&I and actively participate in these initiatives. Each network is allocated a budget of £2,000 for events and training, with additional budget available for larger, firmwide events.

In February 2025, we launched our refreshed E,D&I Strategy, which will guide us through to 2029. This strategy aligns with our firmwide "Fit for the Future" strategy and focuses on the pillars of Education, People, and Culture. E,D&I is now firmly embedded in our Mission statement.

The 2025 data indicates a growing number of team members who identify as having a disability, particularly one that

impacts their daily lives. Concurrently, there has been an increase in disabilities related to mental health. Buzzacott has allocated substantial resources and time to support the mental health and wellbeing of our team members, as well as to raise awareness throughout the firm. These initiatives are aligned with our new "Fit for the Future" and "People First" strategies. Furthermore, the data reveals a rise in the number of team members serving as primary carers for children under the age of 18. This trend has been acknowledged internally, prompting the creation of a Parents and Carers Network and the introduction of Parental Bereavement and Miscarriage Leave policies.

Looking ahead, we remain committed to deepening our E,D&I efforts and ensuring they continue to be an integral part of our behaviours, strategy, and culture—driving meaningful engagement across the firm and fostering an environment where every team member feels valued and empowered.

We look forward to sharing our progress and seeing how these efforts continue to shape our firm and enrich the lived experiences of our team members.

ICAEW 2025 Probate Diversity Survey Introduction

Age, Sex and Gender Sexual Orientation, Disability Ethnic Group, Socio-Economic Background Faith, Social Mobility Caring Responsibilities, Ma Marital Status Le
